RESTRICTIONS

• In horse stables, apply bait only in fly bait stations. Place bait stations in areas inaccessible to animals.
• Do not allow bait to come into contact with food or water.
• Do not place bait in areas accessible to food producing animals, children and pets.
• Do not place bait on crops, grass or in water. Do not apply bait to aquatic environments or to areas where it could drift to blooming crops or weeds if bees are visiting the treatment area.

HOW TO APPLY

• Paint-on application: Mix the fly bait with water.
• Scatter application. Mix 1.5 oz bait with 1 fl oz warm water (3 lbs bait in 1 quart water) and stir thoroughly. Let stand for about 15 minutes until a paste consistency suitable for painting has formed. Apply the paste with a brush to surfaces where flies rest avoiding water (or food) and stir thoroughly. Let stand for about 15 minutes until a paste consistency suitable for painting has formed. Apply the paste with a brush to surfaces where flies rest avoiding water (or food) and stir thoroughly. Let stand for about 15 minutes until a paste consistency suitable for painting has formed. Apply the paste with a brush to surfaces where flies rest avoiding water (or food) and stir thoroughly. Let stand for about 15 minutes until a paste consistency suitable for painting has formed. 
• Around the outside of commercial facilities.

WHERE TO APPLY

• Poultry houses, chicken coops, electricity boxes, power line transformers.
• Do not contaminate water, food, or feed by storage or disposal.
• Do not contaminate water, food, or feed by storage or disposal.

PRODUCT FACTS

Maxforce Fly Bait Granular contains Z-9-tricosene and N-nitro-2-imidazolidinimine. It is a green and environmentally friendly alternative to fly killing products and traps. This product is effective against flies, including species commonly found in chicken houses, and is not toxic to birds or pets. It is non-toxic and can be used in addition to other insect control products.

MAXFORCE 432-1375

FLY BAIT

Note: This product contains the attractant muscalure.

Environmental Science Emergency Response Telephone No. is 1-800-334-7577.

FIRST AID

If inhaled:
• Move person to fresh air.

If swallowed:
• Do not induce vomiting unless told to by a poison control center or doctor.
• Have person sip a glass of water if able to swallow.

If contacted:
• Remove contaminated clothing and wash skin with soap and water.

If contacted in the eyes:
• Wash out eyes with large amounts of water for 15 minutes or until the eyes are comfortable.
• If using contact lenses, remove contact lenses and continue rinsing eye.

If absorbed through the skin:
• Wash affected area with soap and water.

No specific antidote is available. Treat the patient symptomatically.

NOTE TO PHYSICIAN:
Have the product container or label with you when calling a poison control center or doctor or going for treatment.

In case of contact with the eyes:
• Do not rub eye.

Keep out of reach of children. Preferably in a locked place.

FLY MANAGEMENT

CONTROLS

• Fast acting • Ready-to-use scatter bait or paint-on application
• Contains Bitrex • Contains a specially formulated mixture of attractants • Controls flies resistant to organophosphates

HOW TO APPLY

WHERE

WHERE TO APPLY

PRODUCT FACTS

DIRECTIONS FOR USE

Mixing

• Place the bait in a fly bait station or paint onto level surfaces.

Information

• Do not use bait stations indoors.

Storage

• Store in original container and out of the reach of children, preferably in a locked cabinet.
• Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed.
• Protect from heat, excessive light, and moisture.
• Do not contaminate water when disposing of equipment washwaters or rinsate.
• Do not store where it will be exposed to excessive heat, cold, or moisture.

Use

• Use proper sanitation and manure management.
• Use proper light management.
• Use animal exclusion devices to keep flies from entering structures.
• Use approved residual materials for the killed flies. If flies are not killed or are killed but not removed by the residual, apply the bait before they can regroup.
• Do not contaminate water when disposing of equipment washwaters or rinsate. This product is highly toxic to aquatic invertebrates.
• If inhaled:
  • Call a poison control center or doctor for treatment advice.
• If on skin:
  • Take off contaminated clothing.
  • Wash immediately with soap and water, and until all contaminates are removed.
  • Do not give anything to an unconscious person.
• If swallowed:
  • Call a poison control center or doctor immediately for treatment advice.

Ask a question or for comments, call toll-free 1-800-331-2867.

Environmental Science Emergency Response Telephone No. is 1-800-334-7577.

• Call a poison control center or doctor for treatment advice.

Environmental Science Emergency Response Team for decontamination procedures or any other assistance that may be necessary. The Bayer Environmental Science Emergency Response Team can be reached at 1-800-334-7577.
