Storage:
- Store in cool, dry place and out of reach
- Place container(s) securely in a locked cabinet.
- Store in original container.
- Store in a well-ventilated area.
- Handle and open container in a manner as to prevent cross contamination.

Precautions:
- Do not contaminate water, food, or feed by storage or disposal.
- Do not walk through spilled material.
- Do not inhale dust, fumes, or mists.
- Do not enter treated areas immediately.
- Do not allow contact with skin or eyes.

Disposal:
- For proper disposal information, contact your State Pesticide or Hazardous Waste representative at the nearest EPA Regional Office for guidance.
- Fill the container. Do not pour in the sink.
- Do not flush down a drain or offer for recycling.

IMPORTANT STORAGE/USE

IMPORTANT: READ BEFORE USE

The directions for use of this product are believed to be effective for the control of designated insects, provided the product is used in accordance with the directions on this label. Bayer and its agents shall not be responsible for crop injury, ineffectiveness or other unintended consequences that may result because of such factors as weather conditions, presence of other materials, or the manner of use or application. Bayer does not accept liability for the use of this product. Such liability is excluded to the fullest extent possible under the laws of the United States and each State. Bayer does not make any express or implied warranties beyond those which may be required by law, and to the extent permitted by law, all such other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, are disclaimed.

STOP - Read the label before use.

IMPRESSIVE RESULTS

The active ingredient of Tempo 1 Dust is the organophosphorus compound chlorpyrifos. It is a broad-spectrum insecticide that provides residual control against a wide variety of insects, including ants, roaches, fleas, bed bugs, and other common pests.

INDUSTRY LEADER

Bayer CropScience LP is a leader in the development and production of insecticides, herbicides, and fungicides.

LIMITATIONS OF LIABILITY

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, EACH PARTY EXPRESSLY DISCLAIMS ANY AND ALL LIABILITY FOR LOSS OR DAMAGE TO PERSONAL INJURY, PROPERTY, OR FOR ANY OTHER INJURY OR DAMAGE RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

For more information, visit www.bayercropscience.com or call 1-800-334-7577.
This pesticide is toxic to fish and other aquatic organisms. Do not water the treated area to the point of run-off. 

APPLICATION RESTRICTIONS

Do not apply in occupied classrooms.

OTHER INFORMATION

The program of such applications at TEMPO 1% Dust for termite control is based on application to termite bases in building voids. Termite bases are identified by their characteristic tunnels, gallery walls, galleries, and passages. Termite bases are located in spaces between wooden structural members, and between the sill plate and foundation bases, and under wide porches and slab foundations. This product is not recommended as sole protection for termite bases, and other termite treatments or repellent treatments are necessary. It is lethal to slave termites only when the dust is new. Reinfestation by new colonies may occur. The termite dust treatment is intended for use as a termite control only in areas where Formosan, Subterranean, Drywood, or Isolated Termite nests are anticipated. This product is not recommended for Formosan or Subterranean Termite control, due to the risk of resistance.

1. Apply TEMPO 1 Dust to termite bases in building voids. Termite bases are identified by their characteristic tunnels, gallery walls, galleries, and passages. Termite bases are located in spaces between wooden structural members, and between the sill plate and foundation bases, and under wide porches and slab foundations. This product is not recommended as sole protection for termite bases, and other termite treatments or repellent treatments are necessary. It is lethal to slave termites only when the dust is new. Reinfestation by new colonies may occur. The termite dust treatment is intended for use as a termite control only in areas where Formosan, Subterranean, Drywood, or Isolated Termite nests are anticipated. This product is not recommended for Formosan or Subterranean Termite control, due to the risk of resistance.

2. Apply TEMPO 1 Dust to the inside of termite masses. This application is intended to kill the termite queen and any workers or nymphs in the termite mass. This product is not recommended for Formosan or Subterranean Termite control, due to the risk of resistance.

3. Apply TEMPO 1 Dust to termite insecticidal injection equipment. When used to inject termite insecticide treatments, the dust may be carried in a dust container, or used directly as a dust. The dust is effective for Formosan and Subterranean Termite control, and is recommended for Formosan Termite control when used as a dust.
# Tempo® 1% DUST INSECTICIDE

For Use Only By Pest Management Professionals and Commercial Applicators

**Active Ingredient:** Cyfluthrin, cyano(4-fluoro-3-phenoxyphenyl)-methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane-carboxylate ........................................... 1%
