This product is toxic to fish, birds, and other wildlife. Dogs and other predatory and scavenging mammals, water, and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply this product directly to water or to areas where surface water is present or in terrestrial areas below the mean high water mark.

Do not sell this product in individual containers holding less than 4 pounds of bait.

**SELECTION OF TREATMENT AREAS:**

- Do not place near or in ventilated duct openings.
- Do not place near or in ventilated duct openings. Therefore, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where signs of rats or house mice have been seen. Protect from rain and snow. Remove all placed food as possible.

**APPLICATION DIRECTIONS:**

- Use 2 to 8 bait blocks per placement. Space placements at intervals of 15 to 20 feet in related areas. Maintain an uninterrupted supply of fresh bait for 10 days or until there is no longer any signs of recent feeding on bait by rats.
- Use 2 to 8 bait blocks per placement. Space placements at intervals of 100 feet from agricultural structures as defined above, and within 100 feet of agricultural buildings and man-made agricultural structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harbor or attract rodent infestations.

**STORAGE AND DISPOSAL:**

- Do not store this product with chemicals that may contaminate the bait compartments and obtaining bait. If that bait is from bait stations when the bait is still, only water, or on livestock, or other potentially destructive animals, or in areas prone to vandalism.
- Do not sell this product in individual containers holding less than 4 pounds of bait.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**

- Do not sell this product in individual containers holding less than 4 pounds of bait.
- Do not sell this product in individual containers holding less than 4 pounds of bait.

Terad® 3 BLOX

KILLS RATS AND MICE

• All-Weather Formula
• Mold & Moisture Resistant
• Can be Used Indoors or Out
• Kills Anticoagulant-Resistant Norway Rats

ACTIVE INGREDIENT:
Cholecalciferol (CAS #67-97-0): . . . . . . . . . 0.075%

INERT INGREDIENTS: . . . . . . . . . 99.925%

TOTAL        100.000%

NET WEIGHT: 18 lbs (8.2 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panels for First Aid and additional precautionary statements.

DIRECTIONS FOR USE

1. Do not sell this product in individual containers holding less than 4 pounds of bait.

2. Do not place near or inside ventilation duct openings.

3. Do not contaminate water, food, feedstuffs, food or feed crops.

IMPORTANT: Do not use near or inside agricultural structures, barns, granaries, feed storage or feed harvest equipment, or in areas where food harvest equipment or feed harvest equipment is stored.

CONTAINER HANDLING:
Non-Refillable container. Do not reuse or refill this container.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear gloves, wash hands thoroughly after handling this product, and change into clean clothing immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash exposed skin with soap and water.

FIRST AID

If animal eats bait, call veterinarian or 1-877-854-2494 at once.

NOTE TO VETERINARIAN

• Have label with you when obtaining treatment advice.
• Have container with you when obtaining treatment advice.

NOTE TO PHYSICIAN

• If animal eats bait, induce vomiting by using hydrogen peroxide.

• Do not give activated charcoal.

• For animals ingesting bait, induce vomiting by using hydrogen peroxide.

• Have label with you when obtaining treatment advice.

DIRECTIONS FOR USE (Continued from the other side)

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTOR OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, in corners, and concealed places, between floors and walls, or in locations where signs of rats or mice have been seen. Protect bait from sun and snow. Remove as much allelopathic food as possible.

APPLIED DIRECTIONS:

Norway Rats and Roof Rats: Use 2 to 6 bait blocks per placement. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for 10 days or until there are no longer signs of recent feeding on bait by rats.

House Mice: Use 1 to 3 bait blocks per placement. Space placements at intervals of 9 to 12 feet in infested areas. The bait blocks per placement may be used as points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until there are no longer signs of recent feeding on bait by house mice.

FOLLOW-UP: Replace contaminated or soaked bait immediately. Moving grubs, collect and dispose of all dead, exposed animals and manure. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. When a continuous source of infestation is present; establish permanent bait stations and replenish as needed.

HARBORAGE:

Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food harvest equipment, or in areas where food harvest equipment or feed harvest equipment is stored. Set bait blocks to be within 6 feet of structural or man-made agricultural structures such as farm buildings, barns, granaries, feed storage or feed harvest equipment, or in areas where food harvest equipment or feed harvest equipment is stored.

PRECAUTIONARY STATEMENT

CAUTION: Harmful to birds and domestic animals. Do not apply to or around areas frequented by domestic animals or pets. All handlers (including applicators) must wear shoes, socks, and work clothes. Any person who retrieves carcasses or checks for dead animals must wash hands as soon as possible and before eating, drinking, chewing gum, using the toilet and changing clothing.
