Approach to Pest Control: Everyone has their opinion of what pest control is, but I think the most important part of what we do is to prevent pests from coming back. It's one thing to hunt down a pest and eliminate it, but it will just come back if you don't figure out why it is coming in. That's why I spend so much time inspecting for pests, if I can find out how they are coming in, why they are coming in is usually pretty obvious and then I can stop a problem before it gets out of hand.
