RESTRICTED-USE PESTICIDE DUE TO HAZARD TO NONTARGET ORGANISMS
For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's Certification.

PELLETED BAIT

P.C.Q.® PRO
Do not apply by aerial application. Do not apply this product in a way that will contact workers, either directly or through drift. Only protected handlers can be in the area during application.

BUTYROPHONIC: Identify surface trails and the mites leading to the underground burrows. Place Bait stations (10 lb. per acre) one to two months later. For pine tree applications, make a second application (10 lb. per acre) one to two months later.

Note: A Federal Insecticide, Fungicide, Rodenticide Act (FIFRA) prescription is required to use this product in an area where the mites have been brought into production by aerial application.

IDENTIFIED ORGANISMS: For control of any species, aerial application may be made at any time. In orchards, apply at least 20 lbs. per acre to the area where the mites are being found. In non-orchard areas, apply a minimum of 7 lbs. per acre. The application rate may be increased to 10 lbs. per acre if desired. Applications may be repeated at intervals of 1 to 2 years. For pine tree applications, make a second application (10 lb. per acre) one to two months later.
