ANT BAIT STATIONS

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

ATTENTION: Maxforce® FC Ant Baiting Station is a Schedule II pesticide.

CAUTION: See Precautions Below

KEEP OUT OF REACH OF CHILDREN. CAUTION: See Precautions Below

CAUTION

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing for at least 5 more minutes.
• Replace contact lenses, if used, and continue rinsing for at least 5 more minutes.
• Remove any contact lenses, if used, after the first 5 minutes, then continue rinsing for at least 5 more minutes. As long as these instructions are followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop Science, LLC makes no representations as to the safety of any methods or treatments. The risks associated with the use of this product are beyond the control of Bayer Crop Science. All such risks shall be assumed by the user or buyer of the product.

FIRST AID

If swallowed:
• Give 1 or 2 cups of water or whole milk. Do not induce vomiting unless told to do so by a poison control center or doctor.
• If on skin:
• Remove contaminated clothing. Rinse skin with soap and water for at least 5 minutes.
• If on eyes:
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Remove victim to fresh air. If breathing is difficult, give oxygen. Do not give anything by mouth to an unconscious person.

IF CONTACTED WITH SKIN:
• Wash skin with soap and water for at least 5 minutes. Do not use empirical remedies such as cornstarch, flour, or talcum powder. If irritation persists, call a poison control center or doctor for treatment advice.

PHYSICAL OR CHEMICAL PROPERTIES:

 Odorous House Ants, Acrobat Ants and Thief Ants by contact and ingestion. When properly used, MAXFORCE FC Ant Bait Stations can be used in and around homes, businesses, laboratories, computer and electronic equipment facilities, pet shops, zoos, buses, boats, aircraft, and trains. MAXFORCE FC Ant Bait Stations should be used where the bait has been completely consumed and relocated bait stations that show no evidence of ant feeding.

INFORMATION ON FORMULATION:

Maxforce FC Ant Bait Stations are comprised of four ingredients:

• Fipronil* [5-Amino-1-(2, 6-dichloro-4-(1, R, S)-(trifluoromethyl) sulfinyl)-1H-3-pyrazole-3-carbonitrile] ........................................................................ 0.01% (Pesticide)
• 1(3-chloro-4-fluoro-2-nitrophenyl)-4-(1, R, S)-(trifluoromethyl) phenyl)-4-(1, R, S)-(trifluoromethyl)

Fipronil*: [5-Amino-1-(2, 6-dichloro-4-(1, R, S)-(trifluoromethyl) sulfinyl)-1H-3-pyrazole-3-carbonitrile]

ACTIVE INGREDIENT:

Fipronil*: [5-Amino-1-(2, 6-dichloro-4-(1, R, S)-(trifluoromethyl) sulfinyl)-1H-3-pyrazole-3-carbonitrile]

ANT BAIT STATIONS

MAXFORCE® FC Ant Bait Stations contain an attractive bait formulation which kills Pharaoh ants and other common household ants: Argentine Ants, Crazy Ants, Pavement Ants, Cornfield Ants, Odorous House Ants, Acrobat Ants and Thief Ants by contact and ingestion. When properly used, MAXFORCE FC Ant Bait Stations provide effective control of ant infestations in homes, businesses, and public buildings. Maxforce FC Ant Bait Stations are best suited for use in places where restricted access to treated areas cannot be maintained.

DIRECTIONS FOR USE

1. Simply place each bait station indoors or outdoors (adjacent to the home or structure) immediately next to ant trails or close to areas where ants are numerous. Nests are usually located in dark, humid and protected areas. Ants will eat bait stations and transfer or carry the bait back to the nest.

2. Indoor Use: For normal infestations, you should use 3 MAXFORCE FC Ant Bait Stations in an area so that all ant activity is encompassed by the stations. Reapply stations as needed to maintain control of ants. In zoos and pet shops, place bait stations out of reach of zoo animals and pets.

3. Outdoor Use: Bait stations should be placed adjacent to the home or structure near ant activity or anywhere ants may gain access to the home or structure. Application sites include electrical conduits, vents, pipe mounds, garbage cans, and trees; along walls, window sills, sidewalks, and driveways; on ground around home or structure. The stations can be stuck to vertical surfaces by removing the easy peel and stick adhesive covering from the bottom of the station.

4. The bait stations can be stuck to vertical surfaces by removing the easy peel and stick adhesive covering from the bottom of the station.

5. Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.

6. Increased ant activity may be seen near the bait stations immediately after placement for short periods but you can expect to see less activity within three days. After placement, ant trails may be observed between the bait stations and the nests. For best results do not interfere with the ants or the stations because ants must carry the bait back to the nest to allow control to be achieved.

CAUTION

Wash thoroughly with soap and water after handling bait stations.

STORAGE AND DISPOSAL:

Store in a cool dry area out of reach of children. Pesticide Disposal:

Do not contaminate water, food, or feed by storage and disposal. DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
